- Team Player
- Problem Solving
- Adaptability
- Time Management
- Attention to Detail
- Critical Thinking
- Self-Motivation
- Conflict Resolution

Work Experience

Full Stack Web Developer at SMART EDUCATION

2023 – 2025-Jan

Web application for mock-up exams and practice of the PTE (Pearson Test of English) exam

- Front-end Development: Utilized React with Material-UI to create a user-friendly and responsive interface.
- Back-end Development: Implemented server-side logic using PHP Laravel, managing user data, exam content, and results with a robust database system (MySQL).
- API Integration: Developed and integrated RESTful APIs to ensure smooth communication between the front-end and back-end.

My Portfolio - <https://portfolio-fontend-orcin.vercel.app>

Android Mobile Application for PTE Mock Test:

- Created a corresponding mobile version of the web app for Android devices using React Native with TypeScript.
- Ensured feature parity with the web application, optimizing for mobile performance and user experience.

Booking and Blog Wordpress Website

- Developed a WordPress site for consultation booking, blogging, and information sharing regarding English courses and the visa process.

Data analyst at Royisal

2025-current

As a Data Analyst in the jewelry industry, I am responsible for collecting, analyzing, and interpreting data to drive key business decisions. My daily work involves leveraging tools such as Power BI, Excel, and SQL to generate actionable insights from complex datasets, including sales trends, customer preferences, and inventory performance.

Key Responsibilities:

- Build and maintain interactive dashboards and visual reports using Power BI to track KPIs and business performance.
- Analyze customer purchasing behavior and seasonal trends to assist in product planning and marketing strategies.
- Clean, organize, and validate data from various sources to ensure accuracy and consistency.
- Collaborate with cross-functional teams including sales, marketing, and inventory to optimize operations and identify growth opportunities.
- Present analytical findings to management, supporting data-driven decisions across departments.

Notable Contributions:

- Improved reporting efficiency by automating weekly sales reports, reducing manual effort by 40%.
- Identified underperforming product categories, helping the business reallocate marketing resources more effectively.
